Intended use: use this article in your employee newsletters and as the basis for a press release; to promote awareness and a call-to-action for women and their families

Women: Do You Know the Four Symptoms That Occur More Often with Ovarian Cancer?

September is National Ovarian Cancer Awareness Month

September is National Ovarian Cancer Awareness Month. It provides an opportunity to talk about this dangerous cancer and the fact that symptom awareness may be lifesaving.

Ovarian cancer is not a Silent Killer

Studies have shown that ovarian cancer is not silent. Rather, the warning signs are subtle. In fact, 90% of women **do** report symptoms, even at the early stages. Four symptoms have been proven to occur more often in females with ovarian cancer as compared to those in the general public. If any of these symptoms are new and unusual and occur at least 12 times in one month, the woman should see a doctor – preferably a gynecologist:

- ***Bloating***
- ***Pelvic and abdominal pain***
- ***Difficulty eating or feeling full quickly***
- ***Urinary Issues including changes in frequency or urgency.***

Factors That May Decrease and Increase the Risk of Ovarian Cancer

Factors which may decrease the risk of ovarian cancer include: oral contraceptive use, removal of fallopian tubes and/or ovaries, and breastfeeding.

Factors which may increase the risk of ovarian cancer:

- Personal or family history of ***ovarian, breast, uterine, or colorectal cancer***. About 20-25% of ovarian cancer is hereditary. Any female who has been diagnosed with a form of ovarian cancer should be referred to a genetic counselor.
- Increased number of menstrual cycles in a lifetime (never had children, late menopause, etc.)
- Infertility, regardless of whether fertility drugs were used
- Use of Hormone Replacement Therapy
- Increasing Age (Note: ovarian cancer affects all ages and all ethnic groups.)
- Obesity

Why Symptom Awareness is Key

Due to the lack of an early detection test, only 15-20% of ovarian cancer is detected early. In 2017 in the United States, it is estimated there will be 22,440 new cases of ovarian cancer and 14,080 women will die from the disease. In Michigan in 2017, it is estimated there will be 790 cases and 500 women will die from ovarian cancer.

Until There's a Test, Awareness is Best

Early detection of cancer is vital. Since there is no screening test for ovarian cancer, symptom awareness is key. Know your body and know the symptoms.

Quick Data

Intended use: use quick data to help women/people better understand the burden of ovarian cancer.

Quick Data – Ovarian Cancer

United States

- About 22,440 women will receive a new diagnosis of ovarian cancer in 2017
- About 14,080 women will die from ovarian cancer in 2017
- Ovarian cancer is more common in white women than African-American women.
- Ovarian cancer ranks fifth in cancer deaths among women, accounting for more deaths than any other cancer of the female reproductive system.

<http://www.cancer.org/cancer/ovariancancer/detailedguide/ovarian-cancer-key-statistics>

Michigan

- In 2013, there were 714 new cases of ovarian cancer in Michigan
- In 2014, there were 514 deaths in Michigan due to ovarian cancer.

Source: Michigan Cancer Surveillance Program <http://www.cancer-rates.info/mi/>

Projections for 2017:

- It is estimated that in Michigan in 2017, there will be 790 new cases of ovarian cancer
- It is estimated that in Michigan in 2017, there will be 500 deaths due to ovarian cancer

Disparities

United States (rates are per 100,000 population) 2010-2014

- White women have a higher incidence (new cases) rate than Black women (11.8 vs 9.2 respectively)
- White women have a higher death rate from ovarian cancer than Black women (7.7 vs 6.4)

Source: National Cancer Institute. State Cancer Profiles. <http://statecancerprofiles.cancer.gov>. Accessed 19 July 2017

Michigan

In Michigan, White women have a higher rate of new cases of ovarian cancer compared to Black women (12.1 vs. 7.5 per 100,000 population)

Resources

Intended use: promote available ovarian cancer resources to both health care providers and patients. Also be aware of public outreach resources.

MCC Provider Ovarian Cancer Resources – this page includes:

- Ovarian Cancer Fact Sheet
 - Also see CDC ovarian cancer fact sheet at http://www.cdc.gov/cancer/ovarian/pdf/ovarian_facts.pdf
- Provider tools
- Provider education
- Websites of interest
- Other resources

MCC Provider page URL: <http://www.michigancancer.org/Resources/OvarianPV.html>

Patient Ovarian Cancer Resources

Education and awareness materials (signs and symptoms, detection, treatment, clinical trials, survivorship recurrence) can be found and these include:

- Ovarian Cancer Consumer Fact Sheet
- Ovarian cancer symptom cards in English/Arabic and English/Spanish
- Gynecologic cancer symptoms diary
- Listing of gynecologic oncologists in Michigan. Gynecologic oncologists are the preferred healthcare provider for women with any reproductive cancer, including cancer of the ovary.
- Websites
- [Michigan Ovarian Cancer Alliance](http://mioca.org/resources/General-resources) – See MIOCA's website for an up to date list of general, financial, support, and research resources. <http://mioca.org/resources/General-resources>

MCC Patient page URL: <http://www.michigancancer.org/Resources/OvarianPT.html>

Public Outreach Resources

- CDC's Inside Knowledge Campaign – get the facts about gynecologic cancers

MCC Public Outreach page URL: <http://www.michigancancer.org/Resources/OvarianPO.html>

Websites:

- [Michigan Ovarian Cancer Alliance](http://mioca.org) – State wide organization which provides resources and support to survivors, advocates, educates, raises awareness, and funds research. (Partner member of OCRFA) <http://mioca.org>
- American Cancer Society – Learn about Ovarian Cancer <http://www.cancer.org/cancer/ovariancancer/>
- [Ovarian Cancer Research Fund Alliance](http://www.ovariancancer.org/) – Largest global organization dedicated to advancing ovarian cancer research while supporting women and their families. Learn about ovarian cancer: statistics, risk factors, treatment, symptoms/detections, FAQs. <http://www.ovariancancer.org/>
