Facts about Quitting Tobacco

Fact: The decision to quit is the most important decision you can make. Quitting tobacco gives you control over part of your cancer treatment.

Fact: People who smoke at diagnosis have decreased survival, poor cancer treatment outcomes, increased side effects from treatment, and a poorer quality of life.

Fact: The benefits of quitting smoking far outweigh the discomforts of withdrawing from nicotine.

Fact: There are several medications that can help you cope with nicotine withdrawal and increase your chances of overcoming your nicotine addiction.

Fact: Doctors and other health care team members can provide support, information, and any necessary drug therapies to help you quit.

Quit Smoking. **It Matters.**

DIAGNOSED WITH CANCER?

IT'S NEVER TOO LATE TO QUIT SMOKING

It Matters

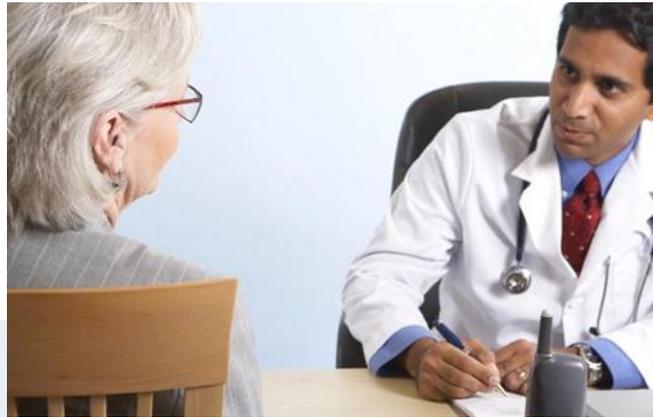

QUITTING ISN'T EASY, BUT
THIS INFORMATION CAN
HELP YOU SUCCEED.

It is never too late to quit smoking.

DANGERS OF CONTINUING TO SMOKE:

- Treatments less likely to be successful
- More side effects from surgery and a slower recovery time
- More side effects from chemotherapy, such as infection and heart and lung problems
- More side effects from radiation therapy, including short-term and long-term complications
- Increased chance of the cancer returning
- Increased risk of other serious illnesses, such as heart and lung diseases or getting a second cancer

We will refer you to the Michigan Tobacco Quitline to help you quit.
